Description:

Need internet access in a vehicle with similar functionality to what they'd expect at home or at work, the AutoSat 2Si offers just that. This system gives reliable web access in almost every part of Europe and beyond.

Based on Crystop's AutoSat 2 satellite TV system, Autosat 2Si is simple to operate and can also be used to receive TV signals, although not at the same time. Additional hardware consists of a special 2-way LNB outside and a specially designed modem on the inside of the vehicle.

This system gives reliable web access in almost every part of Europe and beyond.

40 days access (which can be used at any time during the course of a year) is included with the system and various access packages are available to suit both occasional users and full-timers.
