

CRYSTOP

AutoSat 2 Control 100cm Satellite System

Largest Automatic system on the market

Warranty

36 Month

Features:

- Largest Automatic system on the market
- Motorised satellite reception system for vehicles
- Stationary usage
- 12V operation
- Automatic Digital Self Seeking
- Unique user-friendly controller
- Fast pivoting head technology
- Weather resistant construction
- Fully compatible with all European receivers
- Dish automatically closes when engine started
- Only 21cm in closed position
- Weights only 20kg
- Freesat ready

* SkewMotion option available

Description:

The AutoSat 2 Control 100cm unit, based on the award winning AutoSat 2 design with its well-known reception range benefits, equipped with a state of the art control that will lock onto your chosen satellite "receiver-independent" and that works with all DVB-Compatible digital receiver (Digibox) allowing access to a full range of channels.

You can operate the system directly by using the external remote, so you can mount the control unit anywhere. The operation of the system is cleverly engineered and incredibly easy. Just turn it on and it searches the satellite most recently tuned in. It's satellite search is digital, allowing every satellite receiver to receive TV programs, because the search is independent of the receiver being used. The system comes with a D+ that enables the system to retract automatically when the vehicle engine is started.

It can pick up TV & radio all over Europe thanks to its ability to find 13 satellites. A SKY digibox can be connected to the system. (as with any satellite TV system, what you receive will depend on where you are and what type of receiver you use)

Specification:

Operating voltage: 12v DC

Dish type: Off-set dish

Dish size: 100cm

L.N.B. type: Universal (Single, Twin & Quad options)

Mounting method: Fixes to roof with Sikaflex and / or screws.

Dish colour: White (can be painted any colour)

Search method: System can be used whilst vehicle is stationary.

Search controller dimensions: 200 x 150 x 70 mm (W x H x D)

Typical search time – after first use: Less than one minute

Satellite search options: Türksat, Hellas Sat, ASTRA 2, ASTRA 3a, ASTRA 1, Hotbird, Eutelsat W3, Sirius, Thor/ Intelsat, AB3/Telecom 2C, AB2/Telecom 2D, Hispasat, USERSAT

Receiver options: Can be used with any satellite receiver

Remote control: Yes

Weight of dish & motor: 20 Kgs

Current consumption during search: Approx. 3 Amps

Current consumption when in use and search completed: 0.01 Amps

Dish height when down: 21 cm

Space required for operation of dish: 90 cm (116cm x 100cm when closed)
